The first deposit of my invention goes back up to May 22 2001. During the deposit of this one, I asked how long it would be necessary for me to wait to obtain a patent, the person asked, answered me, that it was necessary to wait generally 4 months.

Given that my plans were not for standards, I so supplied these but by forgetting to translate into in English what, was realized 6/12/2001. During my second movement in Washington. How between May and December ? already 7 months ago. I so rested question to know when I would have my patent, it was answered me that it is necessary wait between 12 and 18 months ? is not there exaggeration ?

On the the other hand this question for me essential . During the reception of your mail of 24/10/2001, a column carries the following mention ; PUBLICATION = NO ? If so my invention has to stay in archives to wait, what can it indeed serve ?

An invention must be at first published, it is the purpose of the inventor to a part to be know, but especially it allows TO TEST ITS INVENTION. There are any sorts of maners to test one invention (the fastest and least costly is test by computer in virtual function) ?

I do apologize for my turn of form English; I have not enough practice to write.

Thank you for your answer in French, you have 900 translators.
Sincerely your's

Bloch
